

RESPOND GLOBAL TRAINING

COURSE: BURNS MASS CASUALTY INCIDENTS

Unique 2-day intensive burns care course guided by new WHO recommendations.

OCTOBER 8TH AND 9TH, 2022

CHRISTIE SPACES, BRISBANE, AUSTRALIA

A NEW APPROACH TO MANAGING BURN INJURIES

This hands-on course is the only one of its kind in the world, presenting a new approach to burns management for MCIs based on the updated WHO guidelines, the development of which was led by Respond Global Founder and emergency response specialist, Dr. Ian Norton.

Mass casualty incidents (MCIs) resulting in burn injuries present unique challenges. As a health practitioner or emergency responder you may have been taught how to deal with a single burns patient, did you know that care of multiple burns victims requires a different approach? Did you know WHO have recently published consensus guidance on this?

With burn MCIs highly likely in Australia, anyone who manages on-scene responses, manages an emergency department, or is in charge of hospital, industrial or state disaster planning and response needs to do this course.

WHAT YOU WILL LEARN

- New WHO recommendations on dealing with burns victims in mass casualty events
- Real world case studies
- On-scene management and challenges
- New mass casualty burns triage process
- Receiving hospital considerations and challenges
- Dressings & pain management
- Controversies in fluid management
- Transition to tertiary care, including retrieval, surgery and rehabilitation
- Incident response coordination, deploying response teams, equipment, emergency management principles and logistics

COURSE STYLE

- Our experts will guide you through new WHO recommendations on mass casualty burns management, using practical in-person training that will apply:
- Real world case study learning
- Practical simulations
- Field and tabletop exercises
- Panel discussions that challenge you
- Hear from those who have been at the forefront of significant mass burns responses. Case study information is drawn from responses including:
 - Ashmore Reef Incident
 - Beirut Explosion
 - Bali Bombings
 - White Island Eruption

WHO SHOULD ATTEND

The course is particularly relevant to the following responders:

- Disaster coordinators & incident controllers
- Medical personnel in emergency, trauma, pre-hospital, on-scene, military, remote & regional response roles
- Fire & Rescue responders
- Occupational health & safety professionals

Or those involved in response in the following environments:

- High-risk industries: mining, oil, gas
- Retrieval services
- Military
- Mass tourism and event coordinators

COST

\$550.00 + GST

Lunch tea & coffee included both days
